

Gene Therapy Research: What You Need to Know

**You're invited to a patient-focused virtual event
about the science behind gene therapy research.**

Thursday, August 20th at 4:00pm PT / 7:00pm ET

We're bringing the hemophilia community together to answer your questions on gene therapy research:

- How is it designed to work?
- What are the possible risks?

Learn more! Share more!

Even if you've attended an educational gene therapy presentation, here's your chance to:

- Ask new questions
- Hear what your peers have on their minds
- Invite a friend

Presented by: Tami Singleton, MD
Director, Hemophilia Treatment Center
Mississippi Center for Advanced Medicine

**Register now for this
exciting event!**

**Our programs are for educational purposes only.
Many gene therapies for hemophilia are being studied
in people to determine if they are safe and effective.
No gene therapies for hemophilia have been approved for use.**
