

**Dr. Brianna Murphy** has been on the HFMD Board since September 2022. She treats hematologic disorders and malignancies in children at Sanford Children's Specialty Clinic, in Sioux Falls, SD. Her research interests revolve around supportive care in pediatric oncology, and focuses on maximizing supportive care to help patients complete their therapy with the best possible outcomes.

Dr. Murphy has focused on nutrition and infectious disease research, but ultimately contributes to the improvement of all supportive care involved in pediatric hematology and oncology.

Dr. Murphy loves the outdoors and frequents national state parks to camp, hike and enjoy the beauty and peace of the wilderness. She also has a strong passion for camp that allows her to see patients outside of the hospital and watch patients to enjoy being kids, and they inspire her every day.
